- ▶ Establish a pilot project to demonstrate the effectiveness of AgroRemed® for addressing the contamination in Lago Agrio;
- ▶ Establish and operationalize a local team to support the bio-remediation of contaminated land;
- ▶ Establish a partnership agreement with Sarva Bio Remed to supply AgroRemed®;
- ▶ Establish a cleanup protocol for each location;
- ▶ Document the overall carcinogenic profile of the population to validate the impact that application of AgroRemed® is having on the community¹; and
- ▶ Secure funding to run the organization. The funding will take into account success of the pilot program and any special pricing agreements between Sarva Bio Remed, LLC and SLACF.

¹Our assertion is that cleanup of oil will reduce the incidents of new cancer cases. We are also aware of the current load of cancer cases making it harder to observable impact in near-term

Executive Team

- ▶ - Dinkar Ganti, Founding Member.

Board of Advisors

- ▶ Marc Bouvier Lucier, ESQ <TBD>
- ▶ Steve Donziger TBD

Thank you for your time!
