**Subject:**FW: 2331 Plaza Site**Date:**Tue, 7 Nov 2017 06:29:39 -0500**From:**Steve Vedder <SVedder@epsofvermont.com>**To:**Carr, Ryan <rcarr@pa.gov>, khorvath@pa.gov <khorvath@pa.gov>**CC:**satyaganti@sarvabioremed.com <satyaganti@sarvabioremed.com>, Satya Ganti (satyaganti13@gmail.com) <satyaganti13@gmail.com>

Ryan/Kathy,

Thank you for the thorough review of the Meeting Minutes/Summary email, as well as for the feedback provided.

I reviewed the Meeting Minutes/Summary email, and as indicated in your response, I inaccurately stated that the 221A and 221B locations were installed south and north of SB-21 , respectively. The 221A and 221B locations were installed north and south of SB-21, respectively.

As an initial step In the development of a Work Plan to address the entire site, Mr. Ganti and his partners plan to move forward with the installation of additional soil borings at the site to address one of the concerns raised during our Site meeting, which was the presence of a continuing source in the vicinity of the steps at the southern end of the loading dock on the western side of the Site building. During this time, the active bioremediation using AgroRemed to promote aerobic oxidation of the compounds of concern will continue.

As suggested during the Site meeting, the plan is to install borings to address the previously unsampled area to the east of SB-21/121, SB-21, SB-221A, as well as obtain additional data from the SB-221A and SB-221B locations, and from the area to the north and west of SB-21/121, SB-221A, and SB-221B.

We will provide an update with the data obtained during the above detailed activities as soon as available.

Enjoy your afternoon,

**Steven R. Vedder**
